

I had a dream...

Imagine...

...clean and quite cities where vehicles cruise silently without tailpipe emission. Cities where you can happily breathe clean air and enjoy birds singing...

This dream is now possible thanks to the **REVA**, the best-selling electric car in the world.

Perfectly silent, the **REVA** emits zero pollutant.

Furthermore, the **REVA** mitigates climate change: The electricity it consumes causes about 4 times less CO₂ than the cleanest petrol cars... and virtually zero CO₂ with renewable or nuclear electricity!

Importer and distributor of electric vehicles

GREEN MOBIL targets to develop sustainable transportation by importing and distributing clean and silent electric vehicles.

GREEN MOBIL is the exclusive dealer for **REVA** electric cars in Belgium, Luxemburg and the Netherlands. It is represented by a growing network of resellers, including in Brussels, Liège and Antwerp.

The electriCity Car

Clean
Practical
Inexpensive

www.reva-car.be

REVA, the dream in cities!

Silent and clean, it protects urban environments. Thanks to its ultra-small size and exceptional turning radius, it slides smoothly through congested traffic and parks virtually anywhere.

Its driving range is most sufficient for daily commuting as well as for urban and short rural trips. And its maximum speed of 80 km/h even allows it on freeways.

The **REVA** is:

Safe: - Anti-crash protection, excellent handling and braking.
- 50 million km without serious injury accident.

Agile: - Very short and exceptionally narrow.
- Incredibly small turning radius.
- No gearbox or clutch.

Reliable: - Little moving parts.
- On the road since 2001.
- Commercialized in Europe since 2003.

Practical: - 3 doors, sits 2 adults and 2 kids.
- Large trunk when folding rear seats.

Inexpensive: - Consumption: € 0.50 to 2 per 100km.
- Annual driving tax: € 0.
